

## Town of Los Altos Hills Benefits

### What is the Safe, Clean Water and Natural Flood Protection Program Renewal?

The Safe, Clean Water and Natural Flood Protection Program funds upgrades to pipelines, dams, and critical water infrastructure to improve water supplies and prepare for the risk of natural disasters and climate change. The updated program will also continue to reduce toxins, hazards, and contaminants in our waterways, provide county-wide flood protection, and protect and improve our natural environment for the overall benefit of residents and wildlife.

### KEY RENEWAL BENEFITS

- Provides funding to support approximately \$2 billion for local capital infrastructure projects that will spur economic activity and is estimated to create approximately 40,000 jobs for the local and regional economy.
- Provides \$53.1 million in grants and partnerships for local governments, agencies, organizations and individuals for water conservation, pollution prevention, creek cleanups and education, wildlife habitat restoration and wildlife corridors and crossings, flood-inducing blockage removal, and access to trails and open space.
- Provides \$3 million, as part of the overall \$53.1 million of funding for grants and partnerships, for small towns like Los Altos Hills who may have had fewer grant and partnership opportunities in previous years.
- Provides \$38.7 million to continue the ongoing coordination with local cities and agencies to help clean up large creekside encampments that may contaminate waterways. This cooperative effort includes working with local municipalities, social services, and nonprofit advocacy groups that will help provide housing alternatives to the unhoused population.
- Provides support for a variety of water conservation rebates and programs for residents to help meet and exceed long-term water conservation and reliability goals.
- Provides funding for the protection of precious natural resources, thereby helping improve the quality of life while keeping a healthy environment.
- Continues emergency response planning and preparedness while providing funding for job-creating projects that protect our communities through vegetation control and sediment removal activities on Valley Water lands such as Arastradero Creek to reduce flood and fire risk.

**A**  
Ensure a Safe, Reliable  
Water Supply

**B**  
Reduce Toxins,  
Hazards and  
Contaminants in our  
Waterways

**C**  
Protect our Water  
Supply and Dams from  
Earthquakes and Other  
Natural Disasters

**D**  
Restore Wildlife Habitat  
and Provide Open Space

**E**  
Provide Flood  
Protection to Homes,  
Businesses, Schools,  
Streets and Highways

**F**  
Support Public Health  
and Public Safety for Our  
Community
