

City of Milpitas Benefits

What is the Safe, Clean Water and Natural Flood Protection Program Renewal?

The Safe, Clean Water and Natural Flood Protection Program funds upgrades to pipelines, dams, and critical water infrastructure to improve water supplies and prepare for the risk of natural disasters and climate change. The updated program will also continue to reduce toxins, hazards, and contaminants in our waterways, provide county-wide flood protection, and protect and improve our natural environment for the overall benefit of residents and wildlife.

KEY RENEWAL BENEFITS

- Provides funding to support approximately \$2 billion for local capital infrastructure projects that will spur economic activity and is estimated to create approximately 40,000 jobs for the local and regional economy.
- Provides \$8.2 million towards the Lower Berryessa Flood Protection project. Once constructed, this project will provide flood protection to 1,100 parcels affected by Upper Calera Creek from near Arizona Avenue upstream to José Higuera Adobe Park, and to an additional 320 parcels along Tularcitos Creek between Berryessa Creek and Interstate 680.
- Provides \$20.4 million towards the Upper Penitencia Creek Flood Protection project, a partnership with the U.S. Army Corps of Engineers, to plan, design and construct improvements along 4.2 miles of Upper Penitencia Creek from Coyote Creek to Dorel Drive.
- Provides \$53.1 million in grants and partnerships for cities like Milpitas, organizations and individuals for water conservation, pollution prevention, creek cleanups and education, wildlife habitat restoration and wildlife corridors and crossings, flood-inducing blockage removal, and access to trails and open space.
- Continues emergency response planning and preparedness while providing funding for job-creating projects that protect our communities through vegetation control and sediment removal activities on Valley Water lands to reduce flood and fire risk.
- Provides \$38.7 million to continue the ongoing coordination with local cities and agencies to help clean up large creekside encampments that may contaminate waterways. This cooperative effort includes working with local governments, social services, and nonprofit advocacy groups that will help provide housing alternatives to the unhoused population.
- Provides \$54 million to the Anderson Dam Seismic Retrofit project that protects Santa Clara County from inundation and destruction in the event of a dam failure, makes us more resilient in the event of a natural disaster, enhances the valley's water supplies, while also providing additional habitat benefits downstream.
