

City of Mountain View Benefits

What is the Safe, Clean Water and Natural Flood Protection Program Renewal?

The Safe, Clean Water and Natural Flood Protection Program funds upgrades to pipelines, dams, and critical water infrastructure to improve water supplies and prepare for the risk of natural disasters and climate change. The updated program will also continue to reduce toxins, hazards, and contaminants in our waterways, provide county-wide flood protection, and protect and improve our natural environment for the overall benefit of residents and wildlife.

KEY RENEWAL BENEFITS

- Provides funding to support approximately \$2 billion for local capital infrastructure projects that will spur economic activity and is estimated to create approximately 40,000 jobs for the local and regional economy.
- Provides \$46 million to continue the San Francisco Bay Shoreline Projection Project, which is a partnership with the California State Coastal Conservancy, the U.S. Army Corps of Engineers and regional stakeholders to provide tidal flood protection, restore and enhance tidal marsh and related habitats, and provide recreational and public access opportunities along Santa Clara County's shoreline, including Mountain View.
- Continues the Hale Creek Enhancement Pilot Project, which is restoring and stabilizing a 650-foot section of concrete-lined channel on Hale Creek, between Marilyn Drive and North Sunshine Drive on the border of Mountain View and Los Altos.
- Provides \$53.1 million in grants and partnerships for cities like Mountain View, agencies, organizations and individuals for water conservation, pollution prevention, creek cleanups and education, wildlife habitat restoration and wildlife corridors and crossings, flood-inducing blockage removal, and access to trails and open space.
- Continues emergency response planning and preparedness while providing funding for job-creating projects that protect our communities through vegetation control and sediment removal activities on Valley Water lands to reduce flood and fire risk.
- Provides \$38.7 million to continue the ongoing coordination with local cities and agencies to help clean up large creekside encampments that may contaminate waterways. This cooperative effort includes working with local governments, social services, and nonprofit advocacy groups that will help provide housing alternatives to the unhoused population.
- Provides \$54 million to the Anderson Dam Seismic Retrofit project that protects Santa Clara County from inundation and destruction in the event of a dam failure, makes us more resilient in the event of a natural disaster, enhances the valley's water supplies, while also providing additional habitat benefits downstream.

A
Ensure a Safe, Reliable
Water Supply

B
Reduce Toxins,
Hazards and
Contaminants in our
Waterways

C
Protect our Water
Supply and Dams from
Earthquakes and Other
Natural Disasters

D
Restore Wildlife Habitat
and Provide Open Space

E
Provide Flood
Protection to Homes,
Businesses, Schools,
Streets and Highways

F
Support Public Health
and Public Safety for Our
Community
